

KAMALA INSTITUTE OF TECHNOLOGY & SCIENCE, SINGAPUR

## A Report on the student attributes facilitated by the Institution

Kamala institute of technology and science has worked to develop desirable attitudes in students through a code of conduct that helps them in personal and professional lives. The students are trained to value their worth and create a positive and productive atmosphere guided by a sense of responsibility in endorsing the institute's quality across various states and nations in which they work. The student counseling process is carried out effectively to bind teachers and students in a relationship of cordiality and mutual trust which continues even after they pass out of the portals of this institute. The suggestion boxes present in the departments help in gathering student feedback which in turn help in qualitative improvement of both the teaching process and infrastructural facilities. The dress code implemented in the college helps in creating a sense of dignity and homogeneity among students. Harmonious relations exist among the students because of a check on deviant behaviors through grievance redressal cell, anti-ragging committee, anti-sexual harassment & women protection cell and department associations that keep students focused on discipline and developing competencies, thereby reducing the scope for distractions. Maximum attendance is ensured through personal counseling and by intimating parents about student attendance through letters and KITS24/7 portal. Acceptance of diversity and uniqueness is taught through team work and gender

equity programs. Patriotism is cultivated through celebration of national festivals. Unity, discipline, selflessness, social responsibility and concern for fellow beings are taught through the NCC wing of the institute. Swach Bharath campaigning and NSS programs at the institute help students develop faith in sustaining the quality of the environment. Competitive spirit, leadership qualities, sportsmanship, creativity and skills in fine arts are nurtured through academic activities, competitions and fests organized by the institute and individual department associations. On the whole the institute, over a period of 23 years has facilitated its students to evolve into morally and ethically responsible human beings and also prepare for life.
